

AFONSO SILVA

SOFTWARE ENGINEER

PROFILE

Software Engineer with over 7 years of experience developing and maintaining scalable web applications. Proficiency with multiple technologies, demonstrating capacity to deliver value in both collaborative and independent projects across various industries.

EXPERIENCE

TRIPTEASE • SET 2024 - PRESENT

I develop commercial data systems that empower our Sales managers, Customer Success Managers, and Finance controllers to efficiently access and manage critical business data. By building robust internal tools and data infrastructure, teams are able to operate more effectively and support thousands of hotels in driving direct bookings and reducing reliance on online travel agencies.

Tech Stack: TypeScript • Node • React • PostgreSQL • Docker • Git • Google Cloud

LIDYA FINANCE • MAR 2022 - AUG 2024

Played a crucial role in Lidya's backend team, specializing in feature analysis, code development, and ensuring on-time project delivery. My commitment extends to providing support for system integrity while actively engaging in peer code reviews and continuously collaborating with all engineering and product teams.

Tech Stack: C# • .NET • PostgreSQL • Git

COFCO INTERNATIONAL • NOV 2019 - NOV 2021

Served as the only software engineer for the Market Risk team, ensuring the design, development, and maintenance of the entire software infrastructure. Deeply involved in understanding business requirements and translating them into effective software solutions. Extensively learned about market risk and financial markets through the guidance of experienced team members.

Tech Stack: C# • .NET • Python • MSSQL • Git

VESTAS • SEP 2018 - NOV 2019

As a Framework team member, I helped develop and maintain various Industry 4.0 projects, primarily involving control systems integrated into SCADA systems. While in this role, the team transitioned to the SAFE methodology to ensure seamless internal alignment and collaboration.

Tech Stack: C# • .NET • MSSQL • JavaScript • Angular • Git

E-GOI • FEB 2018 - JUL 2018

Academic internship completed as part of the Computer Engineering Bachelor's Degree program where I developed a deliverability web dashboard for internal tracking of all relevant metrics.

Tech Stack: Python • Django • PostgreSQL • RRDTool • Munin

ARMIS GROUP • JUL 2017 - SEP 2017

Summer internship done as a challenge presented by Armis, resulting in the creation of a sports results app.

Tech Stack: C# • .NET • Java • Android

EDUCATION

BACHELOR'S DEGREE COMPUTER ENGINEERING • 2015 - 2018

Instituto Superior de Engenharia do Porto

CDIO-IL Project Member - ISEP & Armis Group
